THE OVAL
BY
AURAA

Introduction

The Oval is a high-stakes governance simulator set in the brutal, beautiful universe of EVE Frontier. As the Commander of a deep-space station, you are faced with impossible choices: Will you prioritize the economy at the cost of your soul? Or will you maintain your integrity as the station's lights fade into the void?

Every decision you make ripples through the station's systems, leading to multiple branching paths and unique legacies.

CORE FEATURES

The Decision Engine (Cards & Arcs)

Navigate through unique scenarios. Each choice impacts four critical pillars:

- Public Approval: Your standing with the citizens.
- Economic State: The financial health of your station.
- Station Energy: Your most precious resource for survival.
- Integrity: The moral compass of your administration.

Web3 Integration (Prototype Phase)

- Wallet Connect: Integrated mock-up for SUI Wallet connectivity.
- Legacy Minting: Record your reign on-chain. At the end of each run, players can "Mint their Legacy" as a unique NFT on the Sui Network (Mock).
- Social Proof: Integrated "Share to X" functionality to showcase your leadership stats.

The Lazarus Protocol

When your energy hits zero, the Lazarus Protocol activates—a last-ditch survival mechanism that forces players into high-risk, high-reward scenarios to bring the station back from the brink of collapse.

TECH STACK

- Frontend: HTML5, CSS3 (Modern Glassmorphism), Vanilla JavaScript.
- UI/UX: Space-aesthetic HUD with real-time bar animations.
- Blockchain Concept: Move Language (Roadmap), Sui dApp Kit (Roadmap).

Strategic Roadmap (The Vision)

- Phase 1 (Hackathon): Interactive UI/UX, core game loop, and simulated Web3 interactions.
- Phase 2 (Post-Hackathon): - Implement Sui zkLogin for seamless pilot onboarding.
    - Deploy Move Smart Contracts to store "Station Legacies" as Dynamic NFTs.
- Phase 3: Integration with EVE Frontier Stillness SDK for cross-platform resource trading.

How to Play

1. Clone the repository.
2. Open 2.html in any modern web browser.
3. Connect your (Mock) Sui Wallet.
4. Make your first choice and survive the frontier.

Thank you
very much!
